

# Excellence in high end precision parts and modules

[www.louwers.com](http://www.louwers.com)

Located in Mierlo in the Dutch province of North Brabant, Louwers Mechanical Parts (LMP) is a company with both a rich history and a bright future. Established through close ties with Philips, Louwers is essentially an engineering works specializing in high-precision, complex components. By keeping the wheels of innovation perpetually turning, LMP has always kept looking towards the future, and has never met a challenge too big to take on. All this makes LMP ready for the future – and we hope that future includes you!

## About

Our versatility is one of the assets that makes us unique in the market. We have combined a large number of mechanical operations under one roof for many decades, producing high-quality mechatronic components, spare parts, and modules for a wide array of niche markets. This is facilitated by our ongoing investments in new technologies, people and resources, our solid knowledge of equipment and materials, and our expertise. We routinely use exotic alloys such as Inconel, Hastelloy and Monel. Louwers is equipped to use a wide range of production methods and provides additional services ranging from engineering and Grade-2 production to inventory management, which makes us a versatile and trustworthy partner in the supply chain for high-quality machines and processes.

---

## What do we offer

We are a reliable supplier to companies operating in a wide array of sectors and industries, including the chemical, petrochemical, semiconductor, medical, food, glass-processing and automotive industries – and that's just for starters. We are sure that we can be of value to work with defense. Louwers has a fully climate-controlled production facility.

## High Quality

Quality assurance operations include testing the chemical resistance of metals, determining what cutting speeds to use and how to increase the abrasion-resistance of certain types of metals, as well as the careful treatment of various liquids.

## Top Notch Machines

We are willing to invest and innovate with our clients to facilitate the production process.

## Experienced advisors

Our advisors serve clients with the highest level of personal attention and our range of services are tailored for each client.

## Personal service

Our value-added additional services include a large number of ferrous and non-ferrous operations.

## Our philosophy

Investing in the future: We invest and innovate with our customers to facilitate production processes.

Highest quality: Our quality assurance measures include testing the chemical resistance of metals, determining optimal cutting speeds and increasing the abrasion resistance of certain types of metal, as well as the careful treatment of various fluids.

Personalized service: Our value-added services include a variety of machining processes for ferrous and non-ferrous metals.

Experienced consultants: Our consultants provide customers with personal support and customized services.
